Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a wireless channel structuring method/system.

Each of the independent claims 1 and 8 identifies the uniquely distinct features:

at least one of the sub-carriers, selected from plural sub-carriers used for the frequency division multiplexing, has both an accompanying control channel signal and pilot codes inserted therein.

The closest prior art, Engstrom (US 6,084,871) and Miya (US 2001/0012283) disclose conventional multi-carrier wireless transmission with pilot and sync/control channels in separate sub-frequencies/bands/carriers, either singularly or in combination, fail to anticipate or render the above features obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Bejjami (US 6,430,166) describing a receiver with receiving pilot and control channel from a single carrier.
